

Middle Run Birding Trail Map

The start of the trail is from the parking lot at the end of the gravel driveway off of Possum Hollow Road. The trail is one mile in length, over terrain that is moderately sloped. Trail markers are labeled #1 through #15, and spaced every 100-200 yards apart. These markers indicate excellent places to stop and look for birds, based upon the habitat features and viewing opportunities that the location provides. Between Trail Markers #9 and #12, this is an active biking trail, so please share the trail with those on wheels. For any questions about the trail, please contact Derek Stoner at 302-893-8426 or derek@delawarenaturesociety.org. Enjoy your experience on the Middle Run Birding Trail!
